

SPINE BOARD

Measurements: 1.850 x 425 x 50 mm. Weight 6 kg. The SÖHNGEN spine board has a load carrying capacity of up to 150 kg.

Manufactured from high resistance polyethylene, it is light to carry and easy to store.

Extremely shock and abrasion resistant. Its seamless design prevents fluid retention and cross contamination. Washable, hence easy to clean and maintain.

Its finely crafted, one piece construction gives the SÖHNGEN spine board far greater rigidity, longer durability and minimises contamination.

X-ray translucent.

Includes 3 adjustable safety belts and a head fixation device to maximise patient stability during transport.

Extra large and multiple handholds accommodate flexibility and assist in a more secure rescue.

Can be used in the most inaccessible of areas from mountains, in water, at home or on the road.

At a competitive price, the SÖHNGEN spine board is affordable for even the smallest of rescue organisations.
